Safeguarding  
Collaborative

# Membership Offer

The Funder Safeguarding Collaborative (FSC) is a global network of grant-making organisations driving action to create safer organisational practices and cultures. As the only philanthropic support organisation dedicated to safeguarding, we offer high quality, specialist support that is tailored to the needs of our members. All the knowledge and income generated by our work is reinvested in the network, helping us to transform grant-making for the better.

# Membership levels

We offer three membership levels to suit the needs of different grant-making organisations and philanthropic networks. We also offer investment opportunities for organisations with ambitions to strengthen the field of safeguarding more broadly.

## ACCESS Membership

We recognise that some grant-making organisations may want to find out more before joining our network. By joining as an ACCESS member, you get:

- Regular newsletters about FSC events, safeguarding resources and sector updates.
- Priority access to FSC's paid training courses.
- Access to FSC's initial safeguarding assessment service.

ACCESS membership benefits are **free of charge**. We welcome voluntary contributions from funders who wish to support our work.

## CONNECT Membership

Learning and sharing with others can be hugely valuable, particularly for safeguarding leads in funder organisations. By joining as a CONNECT member, you get:

- In-person and online Peer Learning Circles where you can meet with and learn from safeguarding leads in other trusts and foundations.
- Webinars and other online discussion forums covering all aspects of safeguarding in grant-making organisations.
- Access to the FSC online community where you can post questions and receive sector updates.
- Access to FSC's online resource library containing curated manuals, research and guidance on safeguarding, as well as good practice examples of funder policies and frameworks.
- Access to FSC technical support.
- Regular newsletters about FSC events, safeguarding resources and sector updates.
- Priority access to FSC's paid training courses.

The membership fee for CONNECT members is based on your annual grant-making budget (or in the case of networks, annual operating budget). We welcome additional voluntary contributions from funders who wish to support the strengthening of safeguarding more broadly.

Annual grant-making range	Annual membership fee
\$0-5 million	\$1,280/£1,000
\$5-25 million	\$2,560/£2,000
\$25-50 million	\$3,840/£3,000
Over \$50 million	\$5,120/£4,000

## SUPPORT Membership

Many of our members are keen to take action on safeguarding and value the reassurance of having access to expert support.

By joining as a SUPPORT Member, you receive all the benefits of CONNECT membership, plus up to 10 hours of Anytime Support throughout the year, with direct access to the FSC team for questions, queries, and support around safeguarding.

The annual membership fee for SUPPORT members is based on your annual grant-making budget (or in the case of networks, annual operating budget). We welcome additional voluntary contributions from funders who wish to support the strengthening of safeguarding more broadly.

Annual grant-making range	Annual membership fee
\$0-5 million	\$2,780/£2,200
\$5-25 million	\$4,060/£3,200
\$25-50 million	\$5,340/£4,200
Over \$50 million	\$6,620/£5,200

## Investment options

FSC is fuelled by funders who share our mission to create safer organisational cultures and practices around the world. We provide opportunities for members to invest in research and pilot projects to generate new knowledge and strengthen the evidence base on what works to keep people and communities safe. We welcome discussions with members around potential investment opportunities.

**Safer grant-making. Higher impact.**
